

LEARNING LOG 4

For the period 2nd March 2025 to 7th March 2025

What have I done? (relate tasks to Learning Outcomes)

This week, I focused on improving my technical skills and strengthening my collaboration with coworkers and supervisors:

- I finalized a complete UI style including all fonts, color palettes and UI components. (L01, L03)
- I applied for usability testing by gathering all the feedback from my coworkers and creating a draft before finalizing it. (L04)
- I also participated actively in meetings to design reviews presenting my own ideas too without hesitating. (L07, L08)
- I also handled and took part in assignments by setting clear priorities and meeting the deadline without rushing. (L06)

What I did well (refer to skills used)

- Created a structured design through a UI style guide.
- Confidently attending meetings, sharing own opinions.
- Also managed tasks more efficiently before deadlines.
- Always being available for new collaborations.

What I could improve on (i.e. skills I want to improve)

- I want to enhance UI/UX skills more and can take proper decisions between designs.
- I need to collect more specific feedback during usability testings, focusing on smooth user experience.

Action I can take to improve my skills and learning (make these “SMART”):

Goal: To improve my communication when explaining designs and to gather all usability feedback.

Action: I have to prepare key points of every design and present them in my meetings more logically. I have to prepare for still more usability testing to capture both visual and functional feedback.

Timing: From the fifth week of internship (9th March 2025)
